GROW YOUR BUSINESS THROUGH TRAINING

DEVELOP A HIGH LEVEL OF CRAFTSMANSHIP WITHIN YOUR BUSINESS THROUGH TRAINING.

A consistent level of craftsmanship is important to your clients and your business, so you need to have confidence in your workers' skills. When you have oversight into the training of your workers, you can understand their strengths and areas for development, and teach them according to the standards of your business.

STAY UP-TO-DATE BY TRAINING OTHERS.

Training others will keep you on your toes – it's a good way to keep abreast of the latest industry developments, meet others in the industry and learn some new skills yourself.

TRAIN APPRENTICES AND BUILD SUCCESS.

Training motivates employees to achieve because they feel more invested in the work they're doing. It's great for your business because it encourages your people to stick around and creates a positive organisational culture so important on commercial construction sites.

GIVE BACK TO YOUR INDUSTRY.

Someone gave you an opportunity to gain the skills of your trade. To make sure the industry has enough qualified professionals to be sustainable, we need skilled and willing employers to help shape the next generation of qualified professionals.

**FEE\$
FREE**

The best reason you should start training a new apprentice is industry training fees are free for the first two years of an apprenticeship for eligible first-time learners and apprentices enrolling in eligible programmes.

Visit bcito.org.nz/feesfree for more information.

LEARN THE SKILLS, BECOME QUALIFIED

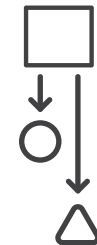

GET YOUR EXPERIENCE RECOGNISED.

Been working in the industry for some time? BCITO can assess your current skills and abilities against the standards required so you can trade up and gain a BCITO qualification.

WHY GET AN APPRENTICESHIP?

Being qualified is a big tick in the right box. It confirms that your skills are at the level that industry expects. If you're already working as a tiler, make more of it by doing an apprenticeship. Gain a professional qualification to recognise the skills you're learning on the job anyway – and open up opportunities for greater responsibility and pay in the future.

HOW DOES A BCITO MANAGED APPRENTICESHIP WORK?

Your employer will train you on the job. They'll ensure your work is up to standard, and that you cover the required scope of work to complete the qualification.

You'll also receive a set of workbooks with modules related to your practical work onsite. You can gather and show evidence of your skills and knowledge through your day-to-day work activities.

You will be assigned a BCITO Training Advisor who will support and guide you through the qualification and conduct the assessments.

**FEE\$
FREE**

There's never been a better time than right now to start an apprenticeship. The New Zealand Certificate in Trowel Trades – Floor & Wall Tiling Level 4 is an eligible qualification where you could have your first 2 years of training fees paid by the Government. Check if you're an eligible individual by visiting bcito.org.nz/feesfree.
